

# K3 KLOTH

## K3 SELECT CLEANER CLOTH

Get up to 50% more lanes before changing rolls with K3 Select Kloth. K3 Select comes in a 30 yard roll compared to the traditional 20 yard roll of K2. With EZ Core Technology, you can still simply toss out used cloth, tape on the new, then twist and go. Save time and minimize wasted cloth with K3 Select!

The average center changes cloth 60 times a year, so with K3 you could change cloth up to 20 fewer times. On average, two feet of cloth are wasted during the winding process; so not only will you save time changing out cloth, but you will also decrease the amount of cloth you waste.

**Compatible with:** Kustodian Plus and later model lane machines (**Not compatible with Crossfire Lane Machines**)
