

When choosing a lane conditioner, you used to have to decide which you wanted more:

- 1. A durable lane conditioner that could withstand aggressive high tech balls or**
- 2. A lane conditioner that was pinsetter and house ball friendly**

FIRE

ICE

**With
FIRE and ICE,
you no longer have to compromise.
You can have it all.**

FIRE and ICE are more durable than any of our existing lane conditioners, but are also pinsetter and house ball friendly like our best-selling lane conditioner, Prodigy.

Now, the only choice you have to make is whether you want FIRE...or ICE.

**FIRE:
For more hook or
slick lane surfaces**

**ICE:
For more hold area
or high friction lane surfaces**
